

Microbial Biotechnologies for Predicting, Preventing and Treating Acid Mine Drainage

Time/Day Australia (AEST)	Time/Day USA (EST)	Time/Day Europe (CEST)	Delivery	Subject	Description
2:00 PM (19 Sept)	12:00 AM (19 Sept)	6:00 AM (19 Sept)	Live Presentation	Microbial Biotechnologies for Predicting, Preventing and Treating Acid Mine Drainage	This Short Course will introduce and provide concepts of microbial influence on acid mine drainage for a non-specialised audience. The course brings together world leading experts from research, industry and government in mine rehabilitation and microbial-based acid mine drainage prediction, prevention and treatment options including selective metal recovery and value-added opportunities to offset some of the costs associated with treatment.
